

Washing Machine Drain Pump

This high-performance drain pump is designed for washing machines. It efficiently removes wastewater during the washing cycle, ensuring optimal performance and preventing water damage.

Product Overview

High-Performance Drain Pump

This durable washing machine drain pump is engineered to provide efficient wastewater removal during the washing cycle. Featuring advanced permanent magnet synchronous motor technology and BLDC capabilities, it allows for adjustable speeds to optimize energy consumption and reduce operating noise. Its robust construction ensures long-lasting reliability and compatibility with standard washing machine plumbing connections.

Technical Specifications

Key Advantages

- Energy saving
- Reduced noise operation
- Steady flow and pressure
- Enhanced safety

Motor Technology

Permanent Magnet Synchronous Motor, BLDC

Application

Intended Use

Dishwasher spray and washing machine drainage

Installation and Maintenance

Design Features

Compact design • Easy installation • Durable construction
