

Washing Machine Motor 160W

High-performance washing machine motor designed for efficient and reliable operation. This motor is engineered to provide optimal torque and speed for various washing machine models.

Product Overview

High-Performance Washing Machine Motor

This 160W washing machine motor is engineered for reliable and efficient operation in demanding laundry environments. It provides optimal torque and speed to ensure effective washing cycles while maintaining energy efficiency. The robust construction guarantees durability and a long service life, making it a versatile choice for a wide range of compatible washing machine models.

Technical Specifications

Power Rating	160 W
--------------	-------

Performance Features

Key Attributes	Energy Efficient, Quiet Operation, High Torque, Durable Construction
