

# Washing Machine Spin Motor 70W 1700 RPM

This spin motor is designed for use in washing machines. It operates at 230V/50Hz with a power rating of 70W and a speed of 1700 RPM.

## ADDITIONAL IMAGES

## Product Overview

### High-Efficiency Spin Motor

This 70W spin motor is engineered for reliable performance in twin tub washing machines. Featuring a robust metal housing and a durable shaft, it is designed for seamless integration and long-lasting operation in household appliances. The unit provides consistent rotational power with a speed of 1700 RPM, ensuring efficient performance for your laundry equipment.

## Technical Specifications

### Electrical Characteristics

**230 V**

Voltage

**50 Hz**

Frequency

**0.8 A**

Rated Current

### Mechanical Details

Feature	Specification
Poles	4P
Insulation Class	Class B
Rotation	CCW
Capacitor	5 $\mu$ F/440V
Rated Power	70 W
Speed	1700 RPM

## Application & Features

### Wiring Color Codes

- Red
- Black
- Blue

### Key Features

Robust Metal Housing, Durable Shaft, High-Efficiency, Compact Design
