Product Overview

High-Performance Washing Machine Timer

This professional-grade washing machine timer is engineered for precision control of soak, wash, and dry cycles. Designed to meet industrial requirements, these units offer reliable performance with a service life of 10,000 cycles. We provide customizable solutions regarding installation dimensions, shaft length, and specific program sequences to ensure seamless integration into your appliance manufacturing process.

Technical Specifications

Key Performance Metrics

10000 cycles

Service Life

250 VAC

Max Rated Voltage

3.5 A

Max Rated Current

Environmental Limits

-10°C to +55°C

Product Variants

Comparison Table

Model	Voltage/Current	Total Time
DXT35-1/2/3	250VAC 3.5A 50Hz	35 min
DXT15	250VAC 3.5A 50Hz	15±2 min
DXT15SF-Q	250VAC 3A or 130VAC 6A	15±2 min
