Product Overview

Precision Water Level Management

This pressure switch is a vital replacement component designed for accurate water level monitoring in automatic washing machines. Featuring a robust circular housing, it ensures consistent performance by triggering electrical contacts based on precise internal pressure detection. Its reliable mechanism prevents overfilling and supports efficient machine operation for industrial or domestic repair needs.

Technical Specifications

Model Compatibility	XQB70-261
Primary Function	Water level sensing and overflow prevention
Housing Material	Yellow industrial-grade plastic

Service & Supply

Service Options	OEM Service, Short Delivery Time, Existing Stock
