

Water Dispenser Resin Filter Cartridge

Resin filter designed for water dispensers. It features a transparent blue plastic housing and contains resin beads for water purification.

Product Overview

High-Efficiency Water Purification

This resin filter cartridge is engineered for integration into standard household water dispensers, providing an effective solution for improving water quality. Utilizing advanced resin bead technology, the filter helps reduce impurities to ensure cleaner, better-tasting water. Its durable, transparent blue housing allows for easy visual inspection of the filter status, making it a reliable choice for maintaining dispenser performance.

Technical Specifications

Filter Type	Resin Cartridge
Application	Household Water Dispenser, Water Purification

Design & Build

Design Features

Transparent Housing • Silver Accents • Cartridge Style

Housing Material	Transparent Plastic
