Overview

Professional Grade Water Filtration Housing

These high-capacity water filter housings are engineered for whole-house filtration systems, providing a reliable solution for sediment, rust, chlorine, and impurity removal. Constructed from durable, food-grade polypropylene, they ensure safe and clean water delivery. Featuring convenient pressure relief valves and standard plumbing connections, these units are designed for ease of maintenance and seamless integration into existing infrastructure.

Technical Specifications

Available Sizes

- 10-inch standard
- 20-inch high-capacity

Construction Materials	Food-grade Polypropylene, Reinforced Polypropylene Cap
Inlet/Outlet Connection	3/4-inch NPT
Compatible Cartridge Diameter	2.5 inch

Features & Benefits

Key Features

Pressure Relief Valve • Leak-proof Seal • Transparent Sump Option • Chemical Resistant

Filtration Capability

4 Contaminant Types

Primary Target Areas

Removes

- Sediment
- Rust
- Chlorine
- Taste and Odors
