Product Overview

Smart Leak Prevention

This standalone water leakage sensor provides essential early warning detection for both residential and commercial environments. It features a compact, low-profile design that allows for discreet installation in vulnerable areas like under sinks, near water heaters, and in basements. By delivering a loud, immediate audible alert upon contact with water, the device helps minimize potential property damage and costly repairs.

Technical Specifications

Alarm Volume

70 dB

Minimum Sound Level

Power Supply

2*CR2450 3V DC

Estimated Battery Lifetime

1 year

Compliance & Quality

Safety Certifications

CE, RED Certified

Installation & Usage

Deployment Features

- Standalone operation (no external control panel required)
- Wireless installation
- Low-profile compact design
- Integrated LED indicator for visual alerts
