

Water Pump for Irrigation and Dewatering

This water pump is designed for a variety of applications, including irrigation and dewatering. It features a powerful engine that provides reliable performance and a high pumping capacity.

Overview

Robust Pumping Solution

The DHP40-DHP50 is a robust and efficient water pump engineered for reliable performance in demanding environments. Designed with a powerful engine, it delivers high pumping capacity suitable for a wide range of water transfer tasks. Its durable construction ensures long-lasting operation, making it an ideal choice for professional irrigation and dewatering applications.

Technical Specifications

Construction

Durable Construction • High-Performance Engine

Model Series

DHP40-DHP50

Primary Applications

Irrigation, Dewatering, Water Transfer
