

Water Pump Pressure Control Switch

This pressure control switch is designed for use with water pumps. It automatically turns the pump on and off based on the pressure in the water system, maintaining consistent water pressure.

Product Overview

Reliable Water Pump Control

This pressure control switch is designed to automate the on/off operation of water pumps based on system pressure requirements. Ideal for both residential and light commercial water systems, it ensures consistent flow and reliable performance. The unit is built with a durable enclosure and features an adjustable pressure setting to provide versatile integration into various plumbing configurations.

Technical Specifications

Key Features

- Automatic on/off operation
- Maintains consistent water pressure
- Durable enclosure construction
- Simple threaded installation

Application Range	Residential, Light Commercial
Connection Type	Threaded connection
Pressure Adjustable	Yes
