

Water Pump with Cooling Fins

This water pump is engineered for diverse applications. It features a durable motor with enhanced cooling fins and corrosion-resistant housing for longevity.

Product Overview

High-Performance Circulation Solution

This water pump is engineered for demanding circulation tasks in pools, spas, and industrial water systems. Featuring a robust motor integrated with enhanced cooling fins, it ensures superior heat dissipation and sustained operational efficiency. Its corrosion-resistant housing provides long-term durability and reliability in diverse environments.

Technical Specifications

Applications

- Swimming pools
- Spas
- Industrial water circulation

Key Features

Corrosion-resistant housing, Enhanced cooling fins, Industrial grade, Standard plumbing fittings

Safety and Compliance

Important Safety Information

Before installing or operating this pump, all personnel must read the instruction manual. Ensure adherence to all provided safety guidelines to prevent accidents and equipment damage. For technical support, please contact the service line at 1-800-991-0466.
