

Water Purification and Distribution System Fittings Kit

This comprehensive kit includes fittings and components for water purification and distribution systems. It contains threaded connectors, valves, filters, and electronic controllers.

Overview

Comprehensive Water Purification Kit

This professional-grade kit provides a complete set of essential components for the assembly and maintenance of water purification and distribution systems. Designed for versatility, the collection includes high-quality valves, filters, housing units, and electronic controllers necessary for optimal system performance. This all-in-one solution simplifies procurement for system integrators and technicians by bundling core plumbing and filtration hardware into a single package.

Core Components

Filtration Media

- PP Cotton Filter
- Granular Activated Carbon
- Compressed Activated Carbon
- RO Membrane

Mechanical Fittings

Valve & Switch Components

- Pressure Tank Ball Valve
- Pressure Reducing Valve
- Inlet Ball Valve
- Three-way Inlet Valve
- Solenoid Valve
- Wastewater Ratio Solenoid Valve
- Low Pressure Switch
- High Pressure Switch

Connector Types

Threaded Quick Connectors, Two-point, One-point, Three-point, Bent Quick Connect, Straight Quick Connect

System Hardware

Hardware List

Component Category	Items Included
Housing & Tanks	RO Membrane Housing, Filter Housing, Pressure Tank
Electronics	8-digit Computer Controller, Power Adapter, Booster Pump
Accessories	Clamps, Faucets, T33 Post-filter, PE Tubing
