

Water Transfer Pump

This robust water transfer pump features a stainless steel pump housing and a powerful electric motor. It is designed for reliable water transfer and pressure boosting in various applications.

Product Overview

Reliable Water Transfer Solution

The TJS 100 water transfer pump is a robust and efficient solution engineered for consistent performance in demanding environments. Featuring a high-quality stainless steel pump housing and a powerful electric motor, this unit is built for durability and long-lasting operation. It is versatile enough to support a wide range of applications, including domestic water supply, agricultural irrigation, and industrial pressure boosting.

Technical Specifications

Model	TJS 100
Housing Material	Stainless Steel

Applications

Primary Functions

- Water transfer
- Pressure boosting

Suitable Sectors	Domestic, Agricultural, Industrial
