

Water Transfer Pump for Irrigation and Drainage

This water transfer pump is designed for drainage and irrigation. Its robust motor ensures efficient water transfer, while the durable housing provides corrosion resistance and longevity.

Product Overview

Professional Water Transfer Solution

This high-performance water pump is engineered for demanding irrigation and drainage tasks in both agricultural and industrial settings. Built with a robust motor, it ensures efficient water transfer and consistent flow rates. The housing is constructed from premium, corrosion-resistant materials, providing the durability needed for long-term operational success in tough environments.

Technical Specifications

Construction

Corrosion Resistant • Durable Housing • Robust Motor

Model Identifier

400T000

Applications

Agricultural Irrigation, Water Drainage, Industrial Use
