Product Overview

Weatherproof design ensures reliable performance in outdoor settings.

Sustainable Outdoor Illumination

This rechargeable motion-sensing wall light is engineered for durability and high-efficiency performance in diverse outdoor environments. Utilizing advanced solar technology, it provides reliable lighting for gardens, pathways, parks, and stairs. Its waterproof design ensures consistent operation regardless of weather conditions, offering a sustainable, energy-saving lighting solution.

Technical Specifications

IP Rating

IP65

Model Number

ESL-06K

Brightness

20 Lumens

Power Technology

Solar Powered, Rechargeable

Features & Benefits

Key Performance Metrics

7 Nights

Autonomy on Cloudy Days

Core Features

- Adaptive Lighting System (ALS) for rainy weather performance
- Integrated Motion Sensor
- Automatic On/Off Function
- High-Efficiency LED

Application

Ideal Use Cases

- Parks
- Gardens
- Pathways
- Stairways
