

# Waterproof SMD5050 Flexible LED Strip Light

This LED strip features high-intensity SMD5050 LEDs on a flexible circuit board, encased in a waterproof silicone sleeve. It is suitable for indoor and outdoor use, providing bright and consistent lighting.

## Product Overview

### High-Performance Flexible LED Lighting

This high-intensity SMD5050 LED strip is engineered for versatility and durability, featuring a flexible circuit board encased in a protective waterproof silicone sleeve. Designed for both indoor and outdoor environments, it provides bright, even illumination suitable for architectural accents, signage, and decorative lighting. Its flexible construction ensures easy installation around corners and curves, while offering energy efficiency and a long operational lifespan.

## Technical Specifications

### Protection Rating

Waterproof

### LED Type

SMD5050

### Key Features

Flexible, Indoor/Outdoor, Low Power Consumption, Long Lifespan, Customizable Length

## Application

### Typical Applications

- Architectural Lighting
- Signage
- Decorative Lighting
- Curve and Corner Installations
