

WD615 Euro 2 Diesel Engine

This diesel engine delivers best-in-class power and minimizes fuel consumption. Its design ensures durability and reduces emissions.

Overview

High-Performance Diesel Engine

The WD615 Euro 2 diesel engine is a 10L powerhouse designed for optimal vehicle matching with five distinct power speeds. It features a wide maximum torque range of 1100–1600 r/min, ensuring superior acceleration and gradeability. Engineered for efficiency and durability, this engine offers advanced fuel economy and reliable performance for demanding professional applications.

Performance Metrics

Lowest Fuel Consumption Ratio

193 g/kW.h
Fuel Consumption

Engine Displacement	10 L
Max Torque Speed Range	1100-1600 r/min

Compliance & Standards

Emission Standard
Euro 2

Key Features

Key Advantages

- Optimized power grading for vehicle matching
- High torque backup coefficient
- Improved acceleration and gradeability
- Low fuel consumption at low and medium speeds
- Enhanced durability through design optimization
