

# Wedge Wire Screen with Rod Support

These wedge wire screens offer robust filtration and separation with a rod support base. Their design ensures structural integrity and efficient flow in various industrial applications.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Wedge Wire Filtration

The Wedge Wire Screen with Rod Support is a precision-engineered filtration solution designed for maximum durability and flow efficiency. Constructed from high-quality profile wire welded to longitudinal support rods, it features a continuous slot design that minimizes clogging and ensures consistent particle retention. These screens are built to withstand demanding industrial environments, offering excellent heat resistance and anti-corrosive properties for long-term reliability.

## Technical Specifications

### Dimensional Range

**6 m**

Max Length

**1200 mm**

Max Diameter

**25 mm**

Min Diameter

### Component Dimensions

Component	Width Range (mm)	Height Range (mm)
Wedge Wire	1.50 - 3.70	2.20 - 7.00
Support Rod	2.30 - 3.70	2.70 - 6.30

### Available Materials

Galvanized Low Carbon (LCG), Stainless Steel 304, Stainless Steel 316

### Slot Size Range

0.10mm to 6.00mm

## Applications

### Primary Applications

- Water Wells
- Oil & Gas Extraction
- Mineral Processing
- Fluid Filtration Systems
- Architectural Facades

## Key Features

### Performance Benefits

High Open Area • Heat-Resistant • Anti-Corrosive • Clog-Resistant • High Structural Integrity
