

Weighing and Packaging Machine with Screw Conveyor

This weighing packaging machine is designed for efficient material handling. It features a screw conveyor for vertical transport and precise weight control.

Product Overview

Automated Material Handling and Packaging Solution

This professional-grade weighing and packaging machine is engineered for high-precision material processing. It features a robust stainless steel construction, a high-capacity hopper, and an integrated screw conveyor system designed for efficient vertical material transport. This automated solution provides reliable quantitative packaging for various granular and powder-based goods, ensuring consistent weight control and operational efficiency.

Technical Specifications

Ideal Applications

- Granular material packaging
- Powder material packaging
- Automated vertical material transport
- Accurate weight-controlled filling

Compatible Materials

Pesticides, Fertilizers, Veterinary medicine, Feed premix, Detergent powder, Salt, MSG, Chicken powder, Sugar, Seeds, Rice

Equipment Class

Quantitative Weighing and Packaging System

Build Material

Industrial Stainless Steel
