

Welding Helmet for Eye and Face Protection

Welding helmet designed for eye and face protection during welding operations. It is constructed from durable materials to withstand heat and sparks.

Product Overview

Professional Eye and Face Protection

This welding helmet is engineered to provide comprehensive protection for the face and neck during intensive welding operations. Constructed from highly durable materials, it effectively shields the user from hazardous heat, sparks, and intense radiation. The integrated viewing window features a specialized dark filter to ensure eye safety, while the adjustable headgear allows for a secure and customized fit for different users.

Technical Specifications

Adjustment Capabilities

- Adjustable headgear for secure fit
- Viewing window with dark light filter

Safety Certifications/Traits

Heat Resistant • Spark Resistant • Radiation Shielding

Protection Coverage

Eye Protection, Face Protection, Neck Protection
