

Welding Machine with Adjustable Voltage and Current

This welding machine is designed for diverse welding tasks. It features adjustable voltage settings for 380V and 220V, along with a current range from 60A to 250A.

Overview

Professional Industrial Welding Solution

The BXI-250-2 is a robust welding machine engineered for versatile industrial and commercial applications. It offers precise control through adjustable voltage and current settings, ensuring high-quality weld performance across various tasks. Designed for reliability, this machine provides the flexibility required for both medium and heavy-duty welding projects.

Technical Specifications

Welding Current Range

60 A

Minimum Current

250 A

Maximum Current

Input Voltage Support	220V, 380V
Model Identifier	BXI-250-2

Performance

Selectable Current Levels

- 100
- 150
- 200
- 250
