

Welding Workstation

The welding workstation is a robust and versatile solution designed for various welding applications. Its modular design allows customization and integration with welding accessories, ensuring efficient and high-quality welding performance.

Overview

Professional H700 Welding Workstation

The H700 welding station is a robust and versatile solution engineered for demanding industrial environments. It provides professional-grade performance with support for single or dual operator configurations to maximize efficiency. Featuring advanced full-bridge dephasing technology, it delivers reliable and high-quality results across a wide range of welding tasks.

Technical Performance

Welding Modes	MMA, TIG, Semi-automatic, FCAW, Low Hydrogen Electrode, Cellulose Electrode
Operator Configuration	Single or Dual

Design Features

Design Advantages

- Modular design for customization
- Durable enclosure for industrial use
- Versatile accessory integration

Internal Technology	Full bridge dephasing
