

Wet Diamond Polishing Pad Set

This set contains diamond polishing pads designed for wet applications. The pads come in various grits, ranging from coarse to fine, to accommodate different polishing stages.

Product Overview

Professional Diamond Polishing System

This versatile diamond polishing pad set is engineered for high-performance surface processing on stone and flooring materials. Designed to handle various stages of refinement, the pads are available in multiple grit sizes to ensure a smooth finish from coarse grinding to fine buffing. The system supports both wet and dry applications, offering flexibility for different site requirements and material types.
