Product Overview

High-Performance Loader Buckets

These heavy-duty loader buckets are engineered with a sloped bottom design to provide smooth loading and reduced wear, ensuring durability in demanding environments. Each unit is specifically optimized for its loader and application, allowing for increased load capacities of 20 to 50 percent. Whether handling coal, woodchips, hot slag, or shredded scrap, these buckets are built to deliver optimal performance and efficient material handling.

Design & Features

Attachment Options

Teeth • Bolt-on cutting edges • Pin-on compatible

Key Features

Sloped bottom design, Reinforced cutting edges, Wear-resistant construction, Optimized geometry, High-strength steel

Applications

Suitable Materials

- Coal
- Woodchips
- Mulch
- Hot slag
- Rocks
- Shredded scrap

Compatibility

Compatibility Overview

Equipment Type	Application Note
Wheel Loaders	Universal mounting system
Skid Steer / Skid Loaders	Universal bucket compatibility
