

Wheel Loader Gear

This gear is designed for wheel loaders. It provides reliable performance and extended service life.

Product Overview

Precision-Engineered Transmission Component

This high-quality gear is specifically designed for integration into wheel loader systems, ensuring optimal power transmission and operational durability. Built to meet stringent quality standards, the component is engineered for heavy-duty construction environments, promoting reliable performance and extended service life. It is an essential spare part for maintaining machinery efficiency and productivity in demanding field conditions.

Technical Details

Part Number	4644351010
Application Compatibility	Wheel Loader

Quality & Compliance

Certifications

CE • ISO

Warranty Terms

- 6 months warranty for main spare parts
- 100% compensation for incorrect parts
- 100% compensation for damage caused by poor packaging

Quality Assurance Process

Five-stage inspection process including detailed photo and video documentation prior to shipment.
