Overview

Versatile Agricultural Power

This wheel tractor is engineered for diverse agricultural environments, including dry and paddy fields. It features a high-performance engine compliant with international emission standards, paired with a reliable synchronizer transmission for smooth operation. With a focus on durability and operator comfort, this machine is designed to handle demanding farming tasks efficiently.

Engine & Performance

Emission Standard

EURO II

Traction Force

10.2 KN

Traction Force

Engine Type

4-cylinder diesel

Transmission & Hydraulics

PTO Rotational Speed

- 540
- 760

Gear Configuration

8 Forward + 8 Reverse

Max Lifting Force

10.1 KN

Compliance & Reliability

Certifications	OECD, EAC, E-mark
Mean Time Between Faults	220 hours

Technical Specifications

Fuel Tank Capacity	50 L
Three-point Hitch	Category I
