

Wheeled Piston Air Compressor for Mining

This is a used piston compressor designed for mining applications. It provides a reliable source of compressed air in demanding environments.

Overview

Industrial-Grade Mining Air Compressor

This robust piston-type air compressor is specifically engineered for demanding mining environments. Featuring a multi-cylinder design driven by a high-capacity electric motor, it delivers consistent and reliable compressed air for heavy-duty pneumatic tools and equipment. Mounted on a heavy-duty wheeled chassis, this unit offers essential portability without compromising on the stability required for rugged industrial sites.

Technical Specifications

Key Design Features

- Multi-cylinder compressor unit
- High-capacity electric motor
- Portable wheeled tank configuration
- Integrated pressure monitoring
- Safety valve protection

Compressor Type	Piston
Primary Application	Mining, Industrial, Pneumatic Tool Operation

Safety & Compliance

Safety Equipment

Pressure Gauges • Safety Valves
