

White Aluminum Oxide Grinding Wheel

8x1/4x1-1/4 Inch

This grinding wheel is designed for electric tools and accessories. It features an 8-inch outer diameter, 1/4-inch thickness, and a 1-1/4-inch arbor hole.

Product Overview

High-Precision White Aluminum Oxide Grinding Wheel

This white aluminum oxide grinding wheel is engineered for precision grinding applications on high-hardness materials, including high-speed steel, high-carbon steel, hardened steel, and alloy steel. Designed for efficiency, it delivers excellent material removal rates while maintaining a fine surface finish. The wheel is suitable for a wide range of sharpening and general-purpose grinding tasks in industrial and workshop environments.

Technical Dimensions

| | |
|----------------|-----------|
| Outer Diameter | 8 inch |
| Thickness | 0.25 inch |
| Arbor Hole | 1.25 inch |

Material Specifications

| | |
|----------------------|--|
| Abrasive Material | White Aluminum Oxide |
| Grit Specification | 38A100 |
| Compatible Materials | High Speed Steel, High Carbon Steel, Hardened Steel, Alloy Steel |

Customization
