Product Overview

Smart Connectivity for Modern Electrical Systems

This Miniature Circuit Breaker (MCB) integrates advanced Wi-Fi connectivity, enabling remote control and real-time monitoring of electrical circuits in residential and commercial environments. Designed for reliability, the unit features an external antenna to ensure stable wireless communication. It provides comprehensive overload and short-circuit protection while offering professional-grade safety features like integrated locking mechanisms.

Technical Specifications

Available Current Ratings

- C16
- C32
- C63

Breaking Capacity	10000 A
Rated Voltage	230V~, 400V~
Rated Frequency	50 Hz

Compliance and Safety

Safety Features

Safety Lock • Pull-Out Lock • Remote ON/OFF Control

Compliance Standards	GB10963.1, CE
