

Wick Drain Installation Machine

This wick drain driver is an innovative machine for pile driving. It is applied to coastal soft soil foundation improvement projects.

Product Overview

High-Performance Wick Drain Installation

This innovative wick drain driver is specifically engineered for coastal soft soil foundation improvement projects. Featuring a robust crawler-based movement system and dual-beam design, it provides exceptional stability and precision during operation. The machine is designed for deep soil insertion, supporting depths up to 30 meters with high-efficiency power systems.

Technical Specifications

Insertion Depth	30 m
Max Insert Rod Diameter	133 mm
Winch Power	30 kW
Lifting Speed	21.5 m/min
Total Power Capacity	100 kva
