

Windshield Wiper Blade

This windshield wiper blade provides streak-free wiping for enhanced safety during driving. Its aerodynamic design ensures consistent contact with the windshield, and its durable construction provides a long service life.

Product Overview

High-Performance Visibility Solution

The windshield wiper blade is engineered for optimal performance and long-lasting durability in diverse weather conditions. Featuring an aerodynamic frame design, it ensures consistent contact with the glass for a streak-free wiping experience. Built with a high-quality rubber compound and corrosion-resistant steel, this blade is designed to withstand harsh elements while maintaining structural integrity.

Technical Specifications

Frame Material	Corrosion-resistant steel
Rubber Compound	High-quality crack and tear resistant compound

Performance Features

Design	Aerodynamic, Streak-free, High-visibility
--------	---

Installation

Vehicle Compatibility	Wide range of vehicle makes and models
Installation System	Yes
