

Wired Computer Keyboard

This is a standard wired keyboard for desktop computers. It features a full QWERTY layout with a numeric keypad and function keys for general purpose typing and data entry.

Overview

Reliable Wired Connectivity

This standard wired computer keyboard is designed for consistent performance in professional and home office environments. Featuring a full-size QWERTY layout, it includes a dedicated numeric keypad and a full set of function keys for efficient data entry and navigation. Its robust wired connection ensures reliable input without the need for batteries or wireless pairing, making it an ideal choice for general-purpose typing.
