

Wired Computer Mouse

This is a standard wired computer mouse with a red glossy finish on the upper shell and a dark gray base. It is designed for desktop or laptop use and connects via a wired connection.

Overview

Ergonomic Wired Mouse

This standard wired computer mouse is designed to provide reliable performance for both desktop and laptop environments. It features a durable construction with a striking red glossy finish on the upper shell, complemented by a solid dark gray base. Ideal for professional or personal use, the wired connection ensures a consistent signal without the need for battery replacements.
