

Wireless ADSL2+ Router

This device is compliant with IEEE 802.11n and backwards compatible with 802.11b/g. It integrates an ADSL2/2+ modem, wireless router, wireless access point, four-port switch, and firewall all in one.

Product Overview

Versatile All-in-One Networking

This high-performance wireless ADSL2+ router integrates a modem, wireless access point, four-port switch, and advanced firewall into a single, compact device. It is engineered for seamless connectivity, offering compatibility with IEEE 802.11n, 802.11b, and 802.11g standards. Designed for home and small office environments, it ensures reliable internet access for streaming, gaming, and general productivity.

Technical Performance

ADSL Standards

- ADSL
- ADSL2
- ADSL2+

Max Downstream Speed	24 Mbps
Max Upstream Speed	1 Mbps
Supported Wi-Fi Protocols	IEEE 802.11n, 802.11b, 802.11g

Hardware Features

Integrated Functions

ADSL2+ Modem • Wireless Router • Access Point • Four-port Switch • Firewall

Antenna Technology	2T2R MIMO
