

Wireless Door Chime System

This wireless door chime system includes a receiver and a transmitter. It offers simple, wireless installation for use in residential or commercial settings.

Product Overview

Professional Wireless Door Chime System

This advanced wireless door chime system utilizes patented low-radiation technology and digital anti-interference protocols to ensure reliable operation. Designed for both residential and commercial environments, it features a long-range transmission distance exceeding 100 meters. The system offers versatile melody selections and energy-saving operation, with extended battery life for both transmitter and receiver units.

Technical Specifications

Transmitter IP Rating

IP44 Waterproof • Dustproof

Working Frequency

433MHz, 315MHz

Operating Range

100 m

Power and Performance

Battery Performance

6 months

Receiver Battery Life

2 years

Transmitter Battery Life

Receiver Power Source

3x LR6 batteries

Features

Available Melodies

- 16-chord melody for digital wireless chime
- 8-chord melody for learning code wireless chime

Compliance and Quality

Certifications

CE, FCC
