

# Wireless High-Fidelity Power Amplifier

This high-fidelity wireless power amplifier is designed for audiophiles and music enthusiasts. It features a robust power supply, low-noise circuitry, and a high-quality amplifier stage for clean, powerful sound.

## Product Overview

### High-Fidelity Wireless Audio Performance

The SF-1.3 is a high-fidelity wireless power amplifier engineered for audiophiles who demand clean and powerful sound. Equipped with a robust power supply and low-noise circuitry, it ensures high-quality signal reproduction for an immersive listening experience. Its durable chassis design provides long-lasting performance, while integrated wireless connectivity allows for seamless streaming from your preferred devices.

## Technical Specifications

Amplifier Category	High-Fidelity Wireless Power Amplifier
Input Sources	Wireless, Tuner, AUX, CD
Build Quality	Sturdy metallic chassis for long-lasting performance

## Interface & Controls

### Control Interfaces

- Power Toggle
- Input Selection Switch
- Volume Adjustment Knob
- Integrated VU Meter

Signal Monitoring	Yes
