

Wireless Inductive Charging Barcode Scanner

This wireless barcode scanner utilizes inductive charging technology. It comes with a base station for charging and wireless connection to a host system.

Product Overview

Professional Wireless Scanning Solution

The XL9310 is a high-performance wireless barcode scanner designed to optimize operational efficiency in retail, warehousing, and logistics. Utilizing advanced inductive charging technology, it eliminates the need for physical cable connections, providing a seamless and durable charging experience. Its ergonomic construction is specifically engineered to support users through extended shifts while maintaining flexibility during scan-intensive tasks.

Key Features

Connectivity	Wireless
Charging Method	Inductive Charging
Applications	Retail, Warehousing, Logistics

Technical Details

Components

- Wireless Barcode Scanner
- Base Charging Station

Ergonomics	Extended use comfort
