Product Overview

Comprehensive Home Security Solution

This wireless smart home security kit provides an all-in-one solution for remote monitoring and automation. Featuring centralized app-based control, users can receive instant alerts from door and motion sensors directly to their mobile devices. The system also supports smart power management, allowing for remote operation of electrical appliances with timer and random functions.

Technical Specifications

Audible Alarm Volume

100 dB

Alarm Volume

RF Signal Frequency

433.92MHz
