Product Overview

Smart Solar Surveillance

This wireless security camera offers an autonomous surveillance solution powered entirely by integrated solar technology. Designed for flexibility, it supports both wireless mobile connections and 4G network integration to ensure constant connectivity. Its weatherproof construction and infrared night vision capabilities make it an ideal choice for reliable outdoor security in both residential and business environments.

Technical Specifications

Network Support	Wireless, 4G Network
Power Supply	Solar-Powered
Local Storage	SD Card

Performance Features

Key Performance Indicators

1 unit
