

Wireless Video Door Phone Kit

This kit provides a convenient way to monitor and control property access. It includes a wireless outdoor camera unit and an indoor monitor with a built-in display.

Overview

Wireless Video Doorphone System

This 2.4GHz wireless video doorphone kit offers a convenient, cable-free solution for property access control. Featuring a 7-inch TFT display and two-way audio communication, it allows for seamless monitoring and remote unlocking. Designed for easy installation, both indoor and outdoor units are powered by rechargeable lithium batteries, making it an ideal security upgrade for homes and small businesses.
