

Wood Drill Bit

This drill bit is designed for boring both hard and soft wood. It features a self-feeding screw point for fast starts and clean, accurate holes.

Product Overview

Professional Performance

This high-performance auger drill bit is precision-engineered for efficient drilling in wood applications. Featuring a self-feeding screw point, it ensures fast starts and produces clean, accurate holes with minimal effort. The optimized spiral flute design facilitates rapid chip removal to prevent clogging and increase overall drilling speed.

Product Features

Key Attributes

- Self-feeding screw point for fast starts
- Spiral flute for rapid chip removal
- Hardened steel construction for durability
- Designed for accurate hole production

Suitable Applications

Woodworking, Construction, DIY Projects

Technical Details

Bit Type

Auger

Material

Hardened Steel
