

Woodworking Back Saw

This back saw features a thin blade and a reinforced back edge to prevent bending. It is suited for fine woodworking, joinery, and other precision cutting tasks.

Product Overview

Precision Woodworking Back Saw

The Woodworking Back Saw is a specialized hand tool designed for fine joinery and precision cutting tasks. Featuring a reinforced back edge, this saw ensures the blade remains rigid during operation, preventing bending and promoting perfectly straight cuts. It is an essential tool for craftsmen requiring clean edges and intricate detailing in their woodworking projects.

Technical Specifications

Design Features

- Reinforced back edge for rigidity
- Thin blade profile
- Designed for controlled sawing
- High accuracy for clean edges

Model Identifier	DT1904
Recommended Applications	Fine Woodworking, Joinery, Precision Cutting, Intricate Detailing
