

Worm Gear Hose Clamp

This worm gear hose clamp is designed to secure hoses onto fittings. Its adjustable clamping pressure, achieved via a slotted screw, makes it suitable for automotive, plumbing, and industrial applications where secure connections are required.

Product Overview

Professional Grade Worm Gear Hose Clamp

This worm gear hose clamp is engineered to provide a secure and reliable connection for hoses attached to fittings. Constructed from durable, high-quality metal, it features an adjustable slotted screw mechanism that allows for precise control over clamping pressure. It is an essential component for maintaining leak-proof seals in a wide range of demanding environments, including automotive, plumbing, and general industrial applications.

Technical Specifications

Clamping Mechanism	Worm gear
Adjustability	Yes
Fastener Type	Slotted screw

Applications

Key Performance Features

- Leak-proof connection
- Durable metal construction
- Adjustable pressure

Primary Applications	Automotive, Plumbing, Industrial
