Product Overview

Professional Stainless Steel Flap Disc

This abrasive flap disc is engineered specifically for grinding and finishing stainless steel and carbon-based metals. Featuring an advanced X-Lock quick-change system, it allows for efficient and tool-free disc changes, significantly reducing downtime. Its overlapping abrasive flap construction ensures consistent material removal and a smooth finish while extending the operational life of the disc.

Technical Specifications

Maximum Speed

12200 rpm
Maximum RPM

Compatibility	Stainless Steel, Carbon Steel, INOX
Mounting Type	X-Lock Quick-Change
Disc Diameter	125 mm

Applications

Typical Applications

- Weld blending
- Deburring
- Surface preparation
- Grinding
- Finishing
