Overview

Professional Abrasive Solution

This flat abrasive wheel is engineered for efficient material removal and surface preparation in demanding industrial environments. Featuring the convenient X-lock mechanism, the tool allows for rapid disc changes to maximize productivity on the job site. Its flat design ensures uniform contact with the workpiece, delivering consistent results across a variety of metal surfaces, including stainless steel.

Technical Specifications

Maximum Operating Speed

12200 RPM
Max RPM

| | |
|----------------------|-------------------|
| Diameter | 125 mm |
| Mounting Standard | X LOCK M14/Ø22,23 |
| Material Composition | Cu, Ni, Ms, Zn |

Application & Compatibility

Compatible Materials

- Stainless Steel (INOX)
- Rust
- Paint
- Flaking Material

Features

X-Lock Quick Change • Flat Profile • Industrial Grade
