

Yamaha SMT Feeder KW1-M1300

This SMT feeder is used in Yamaha pick-and-place machines for the delivery of electronic components. It is engineered for accurate and reliable performance in high-speed SMT assembly lines.

Overview

Precision SMT Component Feeder

This precision component feeder is engineered for high-speed and high-precision assembly in surface-mount technology (SMT) production lines. Designed for reliable delivery of electronic components to pick-and-place machinery, it features a robust mechanical construction to ensure consistent performance in demanding industrial environments. Its modular design facilitates quick changeovers and simplified maintenance, helping to minimize production downtime and enhance overall assembly quality.

Technical Details

Model Number	KW1-M1300
Part Identifier	CL0201-4.4-0073

Compatibility

Compatible Machine Series

- YSM40
- YS100
- YS88
- YS24X
- YS24
- YS12
- YS12P
- YS12F
- YG300
- YG200
- YG100
- YG100R
- YG100A
- YG100RA
- YG100RB
- YG88
- YG88R
- YG12
- YG12F
- YV100XG
- YV100XGP
- YV100XTG
- YV180XG
- YV180X
- YV180
- YV88X
- YVX88SF
- YV112II
- YV112III
- YV120
- YV100E
- YV100
- YV100D
- YV100X
- YV100XE
- YV100XT
