

YAMAHA SMT Pressure Sensor Assembly

This is a pressure sensor assembly designed for YAMAHA SMT equipment. It includes a crystal oscillator and other electronic components on a circuit board.

Product Overview

Professional SMT Equipment Component

This pressure sensor assembly is a high-precision component specifically engineered for surface mount technology applications. Designed for seamless integration, it provides reliable performance within complex assembly systems. This unit is original and new, ensuring compatibility and optimal functionality for maintenance and repair requirements.

Technical Details

Primary Model Number	KV7-M4592-01X
Component Details	Fujikura XFPM-001MPG, SPU-10 94V-0, Crystal Oscillator

Compatibility List

Supported Series

- YV88XG
- YV100X
- YV100XTG
- YV100II

Cross-Reference Parts

Sensor Assembly Variations

Part Number	Description
KV7-M654F-00X	SENSOR 3 E2S-Q22
KV7-M654G-00X	SENSOR 4 E2S-Q22B
KV8-M7160-00X	SENSOR HEAD ASSY 7383
KH5-M655A-02X	FIBER
KM9-M7159-00X	SENSOR, R AXIS
