

YAMAHA YSM20 SMT Timing Belt 783-3GT-9

This timing belt is designed for YAMAHA YSM20 SMT machinery. It ensures synchronous power transmission for reliable operation.

Product Overview

Precision Synchronous Timing Belt

This high-performance timing belt is engineered for specific pick-and-place machinery, ensuring reliable and synchronous power transmission during high-speed operation. It is an original component designed to meet strict operational tolerances, maintaining machine accuracy. Professional-grade materials ensure durability and long service life in demanding surface mount technology environments.

Technical Specifications

Model Number	783-3GT-9
Part Number	KLW-M9199-00
Belt Type	Toothed Synchronous Belt

Compatibility

Compatible Assemblies

- System Unit Assembly
- I/O Conveyor Unit
- Vision Board Assembly
- Servo Board Assembly
- Connection Board Assembly
- I/O Head Assembly

Primary Equipment	YSM20, YV100II, YV100X, YG100, YG200
