

YG309 SMT Pick and Place Nozzle

Precision-engineered nozzle designed for Yamaha YG309 machinery, ensuring optimal performance and reliability in surface mount technology (SMT) applications. Constructed with high-quality materials for durability and consistent operation.

Product Overview

Precision SMT Assembly Component

This high-precision pick and place nozzle is engineered for reliable performance in SMT automated assembly lines. Designed for durability and consistent operation, it supports a wide range of component placements including small chip sizes and ICs. Its robust construction ensures longevity and stability in high-speed electronic component manufacturing environments.

Compatibility and Support

Supported Systems

- YV88XG
- YV88
- YM66
- YV100II
- YV100X
- YS12
- YG300
- YG200
- YG100

Available Nozzle Series

61A-64A, 61F-64F, 301-309, 201-209, 211-214, 71A-79A, 71F-79F

Application Specifications

Compatible Component Sizes

- 0402
- 0603
- 0805
- IC
