

Zinc Coated Steel Sheets with Protective Packaging

These galvanized steel sheets are coated with zinc to prevent corrosion. The bundled packaging ensures protection during handling and shipping.

Product Overview

Zinc Coated Steel Sheets

These zinc-coated steel sheets are engineered for high durability and corrosion resistance, making them an ideal choice for demanding industrial and construction environments. Each batch is professionally bundled with secure strapping and wooden supports to ensure structural integrity during transit. This protective packaging system minimizes handling damage, ensuring the material arrives in optimal condition for your project needs.

Material Properties

Coating Material	Zinc
Base Material	Steel

Logistics & Packaging

Transportation Suitability

Secure Handling • Corrosion Protected • Ready for Storage

Packaging Details	Bundled, Strapped, Wooden Supports
